

# ARCS Data Services and what You can do with Your Data

(with a little help from your friends)

Florian Goessmann  
Manager, ARCS Data Services

- allow research groups and individuals to store manage and share their data
- mirror large datasets between two or more data centres
- make databases accessible by research collaborators based in different organisations

- receive and store large data sets from international partners
- collect datasets locally and make them accessible nationally and internationally
- provide storage targets for data generated with scientific instruments
- assist research groups to arrange dedicated storage

1. ARCS Data Fabric
2. ARCS Database Infrastructure
3. ARCS OPeNDAP Network and Digital Library
4. ARCS Data Transfer Service

Thank you

**Thank You.**
